SUMMARY

Hands-on engineering leader with 18+ years of experience. As CTO I built a greenfield platform, helped build its team and cut costs 5x. As Product Chief Architect I owned a large product's architecture and ran pre-acquisition due diligence on three products. At Perci Health, a UK digital-health company, I co-lead the care platform (FHIR, Medplum, clinical workflows). I stay close to the code.

SKILLS

- **Leadership:** technical strategy and roadmaps, hiring and interviews, mentoring, due diligence, cost optimisation, work with founders and CEOs
- **Architecture:** distributed and event-driven systems, API design, data modelling, cloud migration
- **Technology:** TypeScript, Node.js, C#/.NET, Go, React; GCP, AWS, Azure, Terraform; FHIR, Medplum

EXPERIENCE

Full-stack Developer — Perci Health

UK, remote · digital health · Apr 2025 – Present

- Co-lead the architecture and backend of the next-generation care platform in a team of 7 engineers.
- Set the platform's API patterns, data model and security; built a concurrency layer that protects all APIs.
- Integrated Medplum (FHIR), Awell and Cal.com into care workflows; protected patient data.
- Key role in a high-stakes partner demo that directly supported new commercial agreements.

Software Engineer — Checkatrade

UK, remote · marketplace, 100+ engineers · Feb 2024 – Mar 2025

- Delivered shared tooling and platform upgrades used by 10+ engineering teams (Core Platform team).
- Eliminated hundreds of false error reports a day with Streaming Pull for GCP Pub/Sub consumers.

Full-stack Developer (Part time) — Perci Health

UK, remote · digital health · Jul 2021 – Feb 2024

- Primary engineer and architect of the Employee Benefits Program (thousands of oncology journeys).
- Automated clinical workflows, cutting manual work for oncology nurses and speeding up case reviews.

Chief Technology Officer — Socionom

EdTech, remote · Jan 2021 – Dec 2023

- Joined the founder to build a greenfield platform; defined its architecture, infrastructure and roadmap.
- Helped build the engineering team (3 FE, 3 BE): sourcing, interviews, hiring recommendations, PR reviews.
- Cut infrastructure and third-party costs 5x (~$30,000/year).
- Translated business needs into technical strategy and delivered key features on startup timelines.

Software Engineering Tech Lead — Kana

UK, remote · pricing SaaS · Jan 2022 – Sep 2022

- Led the architecture of a greenfield pricing SaaS, working daily with the CEO.
- Supported 3 full-stack engineers and helped mentor a graduate; introduced a monorepo and CI/CD.
- Built a Go service that held 1M connections in load testing on 2 GB RAM.

Product Chief Architect — Aurea Software

US, remote · Sep 2018 – Apr 2020 (C# .NET Chief Architect, Nov 2017 – Aug 2018)

- Ran technical due diligence on three products with millions of lines of code before acquisition.

- Promoted to Product Chief Architect of a large supply-chain product; defined its long-term evolution.
- Selected and coordinated 12 cross-functional engineers (DevOps, QA, BE, FE, Security) from other teams.
- Cut cloud spend by several thousand USD a month; migrated two products to AWS.

EARLIER ROLES

- **High Robotics**, Technical Founder, 2013–2014: ran a studio; sales, product and engineering.
- **T-Systems**, Principal Software Developer, 2012–2015 · **Nodia**, Senior Full-Stack Engineer, 2023–2024
- **Readify** (Australia), 2015 · **Sensing Cloud SpA**, 2016–2017 · **Intourist – Thomas Cook**, 2010–2012

EDUCATION AND LANGUAGES

- Master's degree, Applied Mathematics — Information Technologies, Saint Petersburg State University, 2008
- English (professional), Russian (native), German and Spanish (elementary)
