19+ years in software engineering	**Former CTO** built a platform and team	**4+ years** in digital health at Perci	**12 engineers** coordinated across teams

SUMMARY

Hands-on engineering leader with 19+ years of experience. As CTO I built a greenfield platform, helped build its team and cut costs **5x**. As Product Chief Architect I owned a large product's architecture and ran pre-acquisition due diligence on three products. At Perci Health, a UK digital-health company whose partners include L&G and Healix, I co-lead the care platform: FHIR on Medplum, care pathways, clinical workflow automation and patient-data privacy. I ship and get things done.

SKILLS

- **Leadership:** technical strategy and roadmaps, hiring and interviews, mentoring, due diligence, cost optimisation, work with founders and CEOs
- **Health-tech:** FHIR, Medplum, EMR/FHIR systems, Awell care pathways, clinical workflows, secure messaging, patient-data privacy
- **Architecture:** distributed and event-driven systems, API design, data modelling, cloud migration
- **Technology:** TypeScript, Node.js, C#/.NET, Go, React; GCP, AWS, Azure, Terraform

EXPERIENCE

Full-stack Developer — Perci Health
Apr 2025 – Nov 2026

UK, remote · digital health

- Co-lead the architecture and backend of the next-generation care platform in a team of **7** engineers.
- Set the platform's API patterns, data model and security; built a concurrency layer that protects all APIs.
- Built FHIR data flows on Medplum; orchestrated scheduling, messaging and Awell care pathways.
- Protected patient data: PII kept out of logs, staff access limited to what each role needs.
- Key role in a high-stakes partner demo that directly supported new commercial agreements.

Software Engineer — Checkatrade
Feb 2024 – Mar 2025

UK, remote · marketplace, 100+ engineers

- Delivered shared tooling and platform upgrades used by **10+ engineering teams** (Core Platform team).
- Eliminated **hundreds of false error reports** a day with Streaming Pull for GCP Pub/Sub consumers.

Full-stack Developer (Part time) — Perci Health
Jul 2021 – Feb 2024

UK, remote · digital health

- Primary engineer and architect of the Employee Benefits Program (**thousands of oncology journeys**).
- Automated clinical workflows, cutting manual work for oncology nurses and speeding up case reviews.
- Built secure, event-driven notifications for patients, clinicians and partners (Paubox, Postmark, Slack).

Senior Full-Stack Engineer — Nodia
Oct 2023 – Jan 2024

Germany, remote

- Sole engineer with the two founders; shipped a production-ready Web3/NFT application.

Chief Technology Officer — **Socionom** Jan 2021 – Dec 2023

EdTech, remote

- Joined the founder to build a greenfield platform; defined its architecture, infrastructure and roadmap.
- Helped build the engineering team (**3 FE, 3 BE**): sourcing, interviews, hiring recommendations, PR reviews.
- Cut infrastructure and third-party costs **5x** (~$30,000/year).
- Translated business needs into technical strategy and delivered key features on startup timelines.

Software Engineering Tech Lead — **Kana** Jan 2022 – Sep 2022

UK, remote · pricing SaaS

- Led the architecture of a greenfield pricing SaaS, working daily with the CEO.
- Supported 3 full-stack engineers and helped mentor a graduate; introduced a monorepo and CI/CD.
- Built a Go service that held **1M connections** in load testing on 2 GB RAM.

Product Chief Architect — **Aurea Software** Sep 2018 – Apr 2020

US, remote · promoted from C# .NET Chief Architect (Nov 2017 – Aug 2018)

- Ran technical due diligence on **three products** with millions of lines of code before acquisition.
- Promoted to Product Chief Architect of a large supply-chain product; defined its long-term evolution.
- Selected and coordinated **12 cross-functional engineers** (DevOps, QA, BE, FE, Security) from other teams.
- Cut cloud spend by several thousand USD a month; migrated two products to AWS.

EARLIER ROLES

2016–2017 **Full-stack Developer — Sensing Cloud SpA** (Chile): startups and a wildfire-prevention non-profit

2015 **Sustained Engineering Developer — Readify** (Australia): healthcare, insurance, logistics clients

2012–2015 **Principal Software Developer — T-Systems International**: 80+ person automotive program

2013–2014 **Technical Founder — High Robotics**: software studio, about five client projects

2010–2012 **.NET Developer — Intourist – Thomas Cook**: tour-scheduling app that replaced Excel workflows

2010 **Software Engineer — Saint Petersburg State Institute of Psychology and Social Work**

2009–2010 **Teacher of the IT course — Saint Petersburg State University**

2008–2010 **Information Technology Specialist — Nevskie Shkafy**: e-commerce site and IT support

2007–2008 **Junior Software Engineer — SEO-promotion group**

EDUCATION AND LANGUAGES

- Master's degree, Applied Mathematics — Information Technologies, Saint Petersburg State University, 2008
- English (professional), Russian (native), German and Spanish (elementary)
